Boston Docs Hit the Web

(June 09, 2004) Boston-based Commonwealth Care Alliance will implement a remotely hosted clinical Web portal from Wellogic Inc., Cambridge, Mass. Contract terms for the Wellogic Consult portal were not disclosed.

Seven clinics aligned with the alliance, which serves elderly and disabled, dually eligible Medicare and Medicaid beneficiaries, will access the portal via secure Internet connections. The online information and services available include: laboratory results and radiology reports; transcribed reports with electronic signature capability; clinical alerts for out-of-range lab values; secure messaging; and medical reference content including a drug database.

The alliance will use the subscription-based portal via the application service provider computing model. The installation is the first ASP contract for Wellogic and also the vendor's first with a non-hospital provider facility. For more information on the technology, visit www.wellogic.com.
